Please complete your registrations on time!

PLENARY SPEECH

TITLE: PLACE BASED LEARNING IS THE FUTURE OF SCHOOLING

Prakash Nair, AIA
President & CEO
Education Design International

Roni Zimmer Doctori
Principal Architect
Education Design International

ABSTRACT

In the future, the time and space-based model of education represented by tens of thousands of schools and universities worldwide will give way to a more distributed place-based learning model. Despite the enormous benefits it offers, place-based learning remains a fringe movement today. This presentation will show how fledgling place-based education movements are already leading the way towards a system of education that is more equitable, humane, economically viable and socially essential. In fact, we predict that place-based education will become the dominant model of learning in as little as 15 to 20 years and will have fully replaced schools as we know them by the middle of the 21st century.

CALL FOR ABSTRACTS

Students of age 9-18 from any European or non-European School, who are interested in attending the conference with or without a presentation, should proceed with the preparation and submission of the abstracts. The Conference will consist of several workshops and sessions covering multiple themes. For more information click [here](#)

**Deadline to submit your abstract for presentation at
EUROMATH & EUROSCIENCE is the 2nd of May 2022**
